Education

SRM Institute of Science & Technology **2023 – May 2027**
Bachelor of Science in Computer Science *Chennai, Tamil Nadu*

Experience

Frinks.AI **January 2026 - March 2026**
Software Engineer Intern *Banglore, Karnataka*

- Developed an **LLM**-powered chatbot trained on internal documents, PDFs, and code repositories to answer employee queries.
- Implemented document ingestion using embeddings and vector databases (FAISS / Chroma).
- Reduced internal support queries and documentation lookup time..
- Built web dashboards using HTML, CSS, and JavaScript to visualize and share daily internal LLM test results.

JPMorgan Chase & Co - Virtual by Forage **July 2025**
Software Engineer Intern *Virtual*

- Completed the JPMorgan Software Engineering Virtual Internship through Forage, gaining hands-on experience in coding, problem-solving, and software development practices.
- Enhanced proficiency in key software engineering concepts, including algorithms, data structures, and system design, through real-world simulation tasks.

Projects

One Stop Personalized Career & Education Advisor | *ML,HTML,CSS,React,MongoDB* **October 2025**

- Engineered a full-stack AI-powered platform for personalized career and education guidance, addressing the needs of students with a focus on Jammu & Kashmir, and scalability to PAN-India.
- Implemented intelligent mentor-matching, course and career recommendations, student profiling, and session scheduling using MongoDB, React.js, Node.js, Google OAuth, and OpenAI APIs.
- Integrated Google Calendar API to auto-generate Meet links for mentorship sessions and built a dynamic admin dashboard for mentor/mentee management.

AI-Powered Finance Management Platform | **Link** *MERN Stack, Python, REST APIs* **Feb 2026**

- Built an AI-Powered Finance Management Platform using the MERN stack, enabling real-time expense tracking, financial insights, and secure user authentication.
- Integrated Machine Learning models (Python, Scikit-learn) to analyze user spending patterns and generate predictive financial recommendations through RESTful APIs.
- Designed and deployed a scalable cloud-based architecture with **JWT** authentication, optimized database queries, and responsive UI for seamless cross-device performance.

AI Hallucination System & Detention | *Python, LLMs, REST APIs, JavaScript, Git* **January 2026**

- Developed a **FastAPI** backend to verify AI-generated text using a **RAG** pipeline, reducing factual errors by cross-referencing live data via **Exa AI**.
- Built a Chrome Extension using Vanilla JavaScript to perform real-time DOM injection, providing a seamless "one-click" correction UI for users.

Technical Skills

Languages: C++, Python, JavaScript, Node.js, React.js, HTML, CSS
Developer Tools: VS Code, Streamlit, Git, GitHub, Google Cloud Platform
Technologies/Frameworks: ML, Django, Numpy, Pandas, LangChain, LangGraph, Scikit-Learn , Tableau

Achievements / Competitive Programming

- Solved **400+ DSA** problems on secured a top position on CodeChef Rating- **1463(Max)** and LeetCode Rating- **1500(Max)**.
- Secured Top Position in multiple college & national-level **hackathons**, gaining experience in rapid prototyping, real-world problem solving, and team collaboration.
- Selected in Forward Program: **McKinsey & Company** .
- **Certification**: **Machine Learning**,Data Structure,Oracle,**NPTEL**,SQL,Python,**AWS**.
